

Model AGO-100

100 liters/day generated at 30°C and 80% relative humidity over 24 hours

Product overview

AGO-100 provides up to 100 liters of clean drinking water per day for schools, kindergartens, hospitals, spa centers, hotels and manufacturing facilities. It generates water directly from the air using a high-efficiency compressor, a multi-stage filtration system and UV sterilization, without the need for plumbing, bottles or regular deliveries. The system consists of an outdoor unit and an indoor unit, ensuring quiet operation in the home or office, as the noise from the generation process remains outside the room.

Technical specifications

Frequency	50/60Hz
Total Power	2.3kW
Operating Temperature	15-38°C
Operating Humidity	45-95%RH
Water Production Capacity	100 liters/day generated at 30°C and 80% relative humidity over 24 hours
Storage Tank Capacity	80 liters
Water Type	Hot and Cold
Filtration System	Primary filter, activated carbon filter, UV sterilizer
Display	LCD Touch Screen
Dimensions	59x59x111 cm
Weight	180 kg
