

Model DWG-16

400W

Product overview

The DWG-16 is an atmospheric water generator designed to produce clean drinking water directly from the air through advanced condensation technology, multi-stage filtration, and UV sterilization. The system provides a reliable source of safe drinking water without the need for a water supply connection, plastic bottles, or bottled water deliveries.

Applications

Ideal for homes, offices, mountain cabins, campers, and locations without access to a central water supply, the DWG-16 combines low operating costs, environmental sustainability, and controlled water quality. The unit is engineered for dependable performance and is backed by warranty coverage and professional technical support for long-term operation.

Technical specifications

Voltage	220/110V
Frequency	50/60Hz
Water Production Power	400W
Heating Power	500W
Total Power	900W
Operating Temperature	15-40°C
Operating Humidity	35-95%
Water Production Capacity	16 liters/day generated at 30°C and 80% relative humidity over 24 hours
Storage Tank Capacity	8 Liters
Water Type	Hot and Cold
Filtration System	12-stage filtration with UV sterilization

Display	LCD Touch Screen
Dimensions	45 × 44 × 56 cm
Weight	36 kg
