

Model HG-30

300W

Product overview

The HG-30 atmospheric water generator produces up to 30 liters of clean drinking water per day directly from the air using advanced condensation technology, multi-stage filtration, and UV sterilization. The system provides a reliable source of safe drinking water without the need for bottled water, deliveries, or connection to a central water supply.

Applications

The unit is ideal for offices, homes, hotels, mountain cabins, medical facilities, production areas, and locations with limited access to drinking water. The HG-30 combines high production capacity, low operating costs, and controlled water quality while reducing plastic waste and water logistics expenses.

The system features an LCD touch display, hot and cold water dispensing, UV sterilization, and a reliable Hitachi compressor designed for long-term, stable operation. Warranty service, professional maintenance, and technical support are included.

Technical specifications

Voltage	220/110V
Frequency	50/60Hz
Water Production Power	300W
Heating Power	500W
Total Power	800W
Operating Temperature	15-35°C
Operating Humidity	45-95%
Water Production Capacity	30 liters/day generated at 30°C and 80% relative humidity over 24 hours
Storage Tank Capacity	12.5 Liters

Water Type	Hot and Cold
Filtration System	12-stage filtration and sterilization, Hitachi compressor, UV sterilizer
Display	LCD Touch Screen
Dimensions	45 x 43 x 112 cm
Weight	49 kg
